Chapter 1

Overview

Topics:

- [Highlights](#)
- [API Changes](#)
- [Map Data Versions](#)
- [Service Endpoint Changes](#)
- [Issues](#)

The scope of this document is to provide the release notes of the Traffic API, version 6.0.41.1. It includes the issues solved within this release.

Highlights

Release 6.0.41.1 incorporated these highlights:

- This release contains a new map version - 2015Q1.
- With this release we are supporting the the traversable state for flow (see more details in dev guide).
 - **Note:** Please ensure that you are using the API as documented in the development guide. Since this release we are enforcing the upper/lower case validation.

API Changes

We are now enforcing the upper/lower case validation for all paths and parameters.

Introduced a new paramater for flow enpoint for traversable state. Please see the development guide for more details.

Map Data Versions

This release contains map data from 2015Q1.

Service Endpoint Changes

There are no changed endpoints for this release.

For more information about endpoints, please see the Traffic API Developer Guide.

Issues

This section contains resolved issues for this service release.

Known Issues

The following table contains known issues.

here

Issue #	Description
1	TPEG GM Delta is not created properly for long corridors.
2	TPEG/TrafficService: RequestMediaTypeToLowerCase puts request string to lower case for all JSON requests
3	TPEG server sends questionable precise information for short tmcs

Resolved Issues

The following table contains resolved issues. This list summarizes the major resolved issues relevant for a broad audience.

Issue #	Description
1	Traffic incidents: Events without RDS-TMC are not correctly translated
2	CLONE - Incidents API returning expired data

No external defects were fixed by this release
