Document Information

Product	
Name:	Batch Geocoder API
Version:	Version 6.2.35.2
Document	
Name:	Batch Geocoder API Release Notes
Id:	2a9711c-1430923818
Status:	FINAL
Date:	2015-May-06, 14:51 (GMT)

Chapter 1

Overview

Topics:

- [Batch Geocoder API Highlights](#)

The scope of this document is to provide the release notes of Batch Geocoder API, with respect to a particular release version. It also includes the issues reported, open and solved within this release.

Batch Geocoder API Highlights

- This release is tested against and runs with the latest Geocoder version. The exact Geocoder version can be found in the report output file of a Batch Geocoder run.

Chapter 2

Release Major Changes

Topics:

- [API Changes](#)

This section documents major changes to the release that may require users to change their applications and/or associated map data.

API Changes

There is one additional parameter available with this release:

The Geocoder introduces a new feature that can show available territories through the point of view of particular countries. A new neutral international view is made available by default, where territories may have unresolved claims.

Choose a political view via

`politicalview=` (country code: 3 bytes, ISO 3166-1-alpha-3)

The following views are supported:

- ARG: Argentina
- GUF: French Guyana
- GUY: Guyana
- IND: India
- PAK: Pakistan
- SUR: Suriname
- VNM: Vietnam

The Batch Geocoder uses the parameter as default for the geocoding query. You can override the default value by a non-empty input cell in the input line:

```
recId|prox|politicalview  
0001|34.0922244,74.8193568,0|IND
```

The result shows "Srinagar" as part of India:

```
recId|SeqNumber|seqLength|displayLatitude|displayLongitude|locationLabel|  
houseNumber|street|district|city|postalCode|county|state|country  
0001|1|3|34.09888|74.81574|Khaniyar, Srinagar, JK, India|||Khaniyar|  
Srinagar|190003|Srinagar|JK|IND
```

With `PAK` in the input line or the parameter `&politicalview=PAK` the result would show "Srinagar" as part of Pakistan.

Note: For the detailed description of the parameter, please consult the *Geocoder API Developer's Guide*. For the detailed description of the available political views, please consult the *Geocoder API Release Notes*.

Chapter 3

D56 Issues

Topics:

- [Resolved Issues and Enhancements](#)
- [Known Issues](#)

This section lists resolved issues and enhancements in the current release. It also lists known issues in the current release.

Resolved Issues and Enhancements

There are no resolved issues or enhancements for this release. For changes in the Geocoder backend software see the respective release notes.

Known Issues

There are no known issues for this release. For known issues in the Geocoder backend software see the respective release notes.
