## Document Information

---

Product	
Name:	Waypoints Sequence Extension API
Version:	Version 2.1.1
Document	
Name:	Waypoints Sequence Extension API Release Notes
Id:	d9e311e-1448608217
Status:	FINAL
Date:	2015-Nov-27, 7:10 (GMT)

## Overview

---

The scope of this document is to provide the release notes of Waypoints Sequence Extension API, with respect to a particular release version. It also includes the issues reported, open and solved within this release.

## Known Issues

---

The following list contains issues known to be present in the current release of the Waypoints Sequence Extension API.

- Response times are elevated if multiple waypoints are located on one routing link.

## Added Functionality

---

There are no major added functionalities in this release.

## Resolved Issues

---

The following table summarizes major issues resolved in Waypoints Sequence Extension API.

Table 1:

Issue ID	Description
1	The parameter <code>mode</code> supports <code>tollroad</code> setting, as described in the matrix routing documentation.
2	Reason for a wrong error message for 101 waypoints has been corrected.
3	Improvements for multiple waypoints on a link.
4	Issue arising from conflicting time constraints and traffic related time shifts fixed. This issue led to an internal server error if traffic was enabled and time constraints were given.

---

## Signature Changes

---

### Added

- No attributes have been added.

### Removed

- No attributes have been removed.
