# Contents

# Chapter

# 1

# Overview

**Topics:**

*   *Highlights*

The scope of this document is to provide the release notes for the Custom Location Extension for a particular release version. It lists added and improved functionality as well as the issues resolved and known issues remaining in this release.

This release is a new implementation and does not try to provide backward compatibility. It has a new set of functions. No feature comparison is provided.

# Highlights

▤ **Important** This release is a new implementation and does not try to provide backward compatibility. It has a new set of functions. No feature comparison is provided.

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Performance and scalability have improved and enable large scale cases such as geofencing.

▤ **Note** This release offers the same functionality for the geometry types points, polygons and layers and does not replace the current service. Instead, both 1.x and 2.x will run in parallel for the foreseeable future. If you want to migrate from an 1.x based application to version 2.x, please contact Technical Customer Support to review the requirements and required changes. For new applications, only use the new version.

# Chapter
# 2

# Changes

**Topics:**

- *Functional and Behavioral Changes*
- *API Changes*
- *Resolved Issues*
- *Known Issues*
- *Limitations and Workarounds*

This section documents major changes to the release that may require the updating of affected applications.

This release is a new implementation and does not try to provide backward compatibility. It has a new set of functions. No feature comparison is provided.

📄 **Note** For changes made in previous releases, see the related documents at *http://developer.here.com*.
