Overview

Topics:

- *Highlights*

The scope of this document is to provide the release notes for the Platform Data Extension API for a particular release version. It lists added and improved functionality as well as the issues resolved and known issues remaining in this release.

Highlights

The following highlights give a short summary of the most important changes, added functionality and improvements:

- We introduced a limitation of 100 requests per hour and 1000 requests per calendar day in the CIT environment. For more information, see *Functional and Behavioral Changes* on page 9.

Chapter

2

Changes

This section documents major changes to the release that may require the updating of affected applications.

📄 **Note:** For changes made in previous releases, see the related documents at *http://developer.here.com*.

New Features

There are no new features in this release.

Functional and Behavioral Changes

The CIT environment allows only 100 requests per hour and 1000 requests per calendar day. For load tests on CIT, coordinate with your account executive or technical customer support.

API Changes

Added

- None.

Changed

- Starting with the 2016Q3 map release, we are moving the `NAMES` column out of the `ROAD_GEOM_FCn` layers into separate `ROAD_NAME_FCn` layers. This might require customers to adapt their software.

Removed

- None.

Resolved Issues

There are no resolved issues in this release.

Known Issues

There are no known unresolved issues in this release.

Limitations and Workarounds

There are no limitations and workarounds in this release.
