Overview

Topics:

- *Highlights*

The scope of this document is to provide the release notes for the Public Transit API for a particular release version. It lists added and improved functionality as well as the issues resolved and known issues remaining in this release.

Highlights

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Introduced two endpoints:
  - Transit Alerts
  - Route Segment Updates

See *API Changes* on page 9 for details.

Chapter

2

Changes

This section documents major changes to the release that may require the updating of affected applications and/or associated map data.

📄 **Note:** For changes made in previous releases, see the related documents at *http://developer.here.com*.

Functional and Behavioral Changes

Updated coverage information. For details of the coverage update, see the Public Transit API Developer's Guide.

API Changes

Added

- Introduced Transit Alerts endpoint, allowing you to request real-time alerts of delays, cancellations and other annoucements provided by transit agencies, in areas where this is available.
- Introduced Route Segment Update endpoint, allowing you to make a subsequent request for a section of a trip rather than for the entire trip.
- Added `sec_ctx` parameter to Transit Routing request, allowing you to request a context for transit segments update, to use as input parameter for Route Segment Update endpoint.
- Added `first_last_mile` parameter to Transit Routing request, allowing you to include local transits at the beginning and the end of a long-distance route.

Resolved Issues

There are no resolved issues in this release.

Known Issues

There are no known issues associated with this release.

Limitations and Workarounds

There are no limitations and workarounds in this release.
