# Chapter 1

## Overview

---

### Topics:

- [Highlights](#)

This document provides a summary of important changes for this version. Apart from newly resolved issues and added or improved functionality, this document also includes information about known issues remaining in this release as well as any existing limitations and workarounds.

## Highlights

---

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Metadata API introduced to support access to multiple namespaces and HERE Account token authorization
- Discovery and Routing services has been updated to support private venues

## Chapter 2

# Changes

---

### Topics:

- [Functional and Behavioral ...](#)
- [API Changes](#)
- [Resolved Issues](#)
- [Known Issues](#)
- [Limitations and Workaround...](#)

This section documents major changes to the release that may require the updating of affected applications and/or associated map data.

📄 **Note:** For changes made in previous releases, see the related documents at <http://developer.here.com>

## Functional and Behavioral Changes

---

The following table contains descriptions of added or changed functionality and changes in product behavior.

**Table 1: Functional and Behavioral Changes**

#	Description
1	A new Metadata API has been introduced that can give users access to multiple namespaces, and also supports HERE Account token authorization.
2	The discovery and routing services now support private namespace content.

---

## API Changes

---

### Added

- Metadata API introduced to allow access to multiple namespaces. HERE Account token authorization now supported.
- Routing service now supports private content.
- Discovery service updated to version 2, introducing support for private content

### Changed

- None

### Removed

- None

## Resolved Issues

---

There are no resolved issues in this release.

## Known Issues

---

The following list contains issues known to be present in the current release of the Venue Maps API.

- Venues in private namespaces (as returned by the new Metadata API) are currently only available in the *models-full* content format.
- When displaying tiles on top of the HERE Maps canvas, venue maps content may partially overlap map elements like roads and water features. This is a known source data issue.
- We may remove undocumented attributes in JSON content at any time without prior notice.

## Limitations and Workarounds

---

**Table 2: Limitations and Workarounds**

#	Limitation	Workaround
1	Indoor routing supports only <i>pedestrian</i> routing at the moment.	No workaround available.
