Chapter 1

Overview

Topics:

- [Highlights](#)

This document provides a summary of important changes for this version. Apart from newly resolved issues and added or improved functionality, this document also includes information about known issues remaining in this release as well as any existing limitations and workarounds.

Highlights

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Removed the Transit Isoline endpoint temporarily from the API offering until it is possible to bring it back up again at a later date.
- In addition, the Response Data Types section of the Developer Guide has been restructured in order for the document to be more in line with the documentation of similar API services.
