Chapter 1

Overview

Topics:

- [Highlights](#)

This document provides a summary of important changes for this version. Apart from newly resolved issues and added or improved functionality, this document also includes information about known issues remaining in this release as well as any existing limitations and workarounds.

Highlights

The following highlights give a short summary of the most important changes, added functionality and improvements:

- The map reference fields have additional fields available in results.

Chapter 2 Changes

Topics:

- [Functional and Behavioral ...](#)
- [API Changes](#)
- [Resolved Issues](#)
- [Known Issues](#)
- [Limitations and Workaround...](#)

This section documents major changes to the release that may require users to change their applications and/or associated map data.

Note: For changes made in previous releases, see the related documents at <http://developer.here.com>. For more information on the latest version of the Batch Geocoder API such as authentication and platform migration details, see the Batch Geocoder API Developer's Guide.

Functional and Behavioral Changes

There are no added or changed functionalities, or changes in product behavior, in this release.

API Changes

Added

- None.

Changed

- Additional map reference fields are now available for results when requesting with `&locationattributes=mapReference`, `&locationattributes=mr` or `&locationattributes=all`. These are the following:
 - `mapReferenceMapId`
 - `mapReferenceMapReleaseDate`
 - `mapReferenceAddressId`

Removed

- None

Resolved Issues

There are no resolved issues in this release. For changes in the Geocoder backend software, see the respective release notes.

Known Issues

There are no known issues for this release. For known issues in the Geocoder backend software, see the respective release notes.

Limitations and Workarounds

There are no limitations and workarounds in this release.
